

Bovimec Cattle Pour-On - (Low Volume Ivermectin Drench)

Bovimec Cattle Pour-On is used for the treatment and control of Ivermectin-sensitive internal and external parasites of cattle. **Bovimec Cattle Pour-On** is oil based, non flammable product that is a double strength Ivermectin Pour-On and has a 21 day meat withholding period. Due to its distinctive oil based formulation, **Bovimec Cattle Pour-On** provides an enhanced rainfast period.

Active Constituent: 10mg/mL Ivermectin

Similar or Equivalent Products: Genesis[®] Pour-On Ivermectin Endectocide for Cattle Ancare[®] Australia Pty Ltd.

For the Treatment and Control of Ivermectin Sensitive:

Gastrointestinal nematodes
Lungworms
Eyeworms
Sucking & Biting Lice
Mites
Buffalo Flies
Cattle Ticks

Withholding Period:

Meat: DO NOT USE LESS than 21 days before slaughter for human consumption.

Milk: Nil

Export Slaughter Interval (ESI): Do not slaughter for export within 21 days of treatment.

Rain Fast: Rainfall on cattle less than 2 hours after dosing may result in reduced efficacy.

Pack Sizes: Bovimec is available in 1L, 2.5L, 5L, 10L and 20L pack sizes.

As Bovimec is a low volume drench, 1 x 20L Bovimec is equivalent to 2 x 20L Ivermectin 5g/L Drench.
